A paragraph entailing the business statement in about 100 words.

Talius is a company that has made roll shutters and habitat screens for 30 years. They take pride in giving excellent service and after sales support to all of their customers. Talius provides peace of mind with their roll shutters allowing businesses and homes to feel protected when people or employees are away. The habitat screen they sell provide protection from the sun while keeping your house cool and saving energy in the process.

Project objectives and a project description stated clearly.

The project is a responsive webpage with a pleasing style.

The project objective is to create a useable webpage that informs the user about Talius and its services.

A brief explanation of how the business would benefit from your design in about 100 words

My design has high contrast which is important to consider when creating a web page. Too little contrast can make it harder for the user to quickly get the info they are looking for. My web page has several call to action statements, useful for getting user to engage with the site and learn more about the products. The website also has informative media in the form of images and videos in its gallery page which can help users understand the products. All of these things combined can benefit a businesses' web page and as a result the company as a whole.

Any other appropriate relevant documentation pertaining to your site that you wish to include.

My reference sheet links to my Github page for convenience. I asked Mohd in class and he said this was ok.

I hope that makes marking go faster.

Thank you

Design a short evaluation form that the business would complete

Evaluation Form:

design (circle one)

great good ok not-great poor

Ease of navigation (circle one)

great good ok not-great poor

Responsiveness (circle one)

great good ok not-great poor

What was your first impression of the site?

Was there anything missing you would want to have on the site?

What do you think would improve the sites usefulness?

Thank you for your feedback.
